Getting electrical signals from point A to point B is pretty standard thing...Put a piece of copper wire between A and B and the job is done. A century of development has left us with increased specialization in wiring, connection devices, and everything in between point A and B. "Mil-Spec" or military specification, has become the buzz-word in motorsport electrical harness construction.

General information. Although the two most well-known styles of long top-bar hives are named "Kenyan" and "Tanzanian", the Kenyan hive was actually developed in Canada, and the so-called Tanzanian hive is not the same as the top-bar hive that was developed in Tanzania. The design of top-bar hives has its origins in the work done in 1965 by Tredwell and Paterson.
