Summary of mechanisms of resistance to antibiotics that target protein biosynthesis. Resistance mechanisms are organised according to whether they have been either acquired by horizontal transfer or by mutations in chromosomal genes. The resistance determinants are described in the text. TetO/M is an EF-G-like molecule that displaces Tet from ...

Antibiotic resistance in Staphylococcus aureus ... - Oxford Academic

About the Societies. The Association for Academic Surgery is widely recognized as an inclusive surgical organization. The impetus of the membership remains research-based academic surgery, and to promote the shared vision of research and academic pursuits through the exchange of ideas between senior surgical residents, junior faculty and established academic surgical professors.
