Capital Controls In Brazil Effective

The Russian central bank has relaxed temporary capital control measures, which were introduced to support the domestic currency and prevent capital outflows amid Ukraine-related Western sanctions. According to the Bank of Russia, starting on April 18, domestic banks are once again allowed to sell euros and dollars to individuals.

Russia eases capital controls - bignewsnetwork.com

In international economics, the balance of payments (also known as balance of international payments and abbreviated BOP or BoP) of a country is the difference between all money flowing into the country in a particular period of time (e.g., a quarter or a year) and the outflow of money to the rest of the world. These financial transactions are made by individuals, firms and government bodies to ...
