ChemActivity 6 1. The number of the valence shell corresponds to the number of the row of the Periodic Table.

2. Because the nuclei gain one proton as one moves from left to right across a period but the number of inner shell electrons remains constant.

6. IE of Kr > IE of Br because they are in the same valence shell and Kr has the higher core charge (+8 vs. +7). IE of Rb is the lowest because core charge is +1 and its valence shell ( $n = 5$ ) is larger than the valence shell ( $n = 4$ ) of Kr and Br.
