# File Type PDF Feline Infectious

Assessment Color  
Review covers all types  
of feline infectious  
diseases, including  
infections caused by  
viruses, bacteria,  
parasites and fungi.

199 clinical cases are  
presented randomly,  
as in practice, but the  
wide range of cases  
cover infectious  
diseases which affect  
all the organ systems  
of the cat. The  
illustrated clinical  
cases contain

# File Type PDF Feline Infectious

Assessment Color  
Review (2018) In this  
book Canine Infectious  
Diseases PDF, we have  
provided an overview  
of canine infectious  
diseases in a case-  
based manner in the  
way clinicians  
encounter them in  
daily practice all over  
the globe. Because of  
the global nature of the  
case descriptions,  
several unique cases  
and images that have  
not been published

Feline

immunodeficiency virus (FIV) decreases the function of the immune system and causes AIDS in cats.

The virus is spread through the saliva of an infected cat, primarily by biting.

# File Type PDF Feline Infectious Diseases Self

Cats that roam outdoors, male cats, and older cats are more likely to become infected. This condition is diagnosed using a blood test.
