The Bosnian pyramid complex is a pseudoarchaeological notion to explain the formation of a cluster of natural hills in the area of Visoko in central Bosnia and Herzegovina. Since 2005, Semir Osmanagić, a Bosnian-American businessman based in Houston, Texas, has claimed that these hills are the largest human-made ancient pyramids on Earth. His claims have been overwhelmingly refuted by ...

Bosnian pyramid claims - Wikipedia

Flint, chert, and jasper are a few of the many names used for microcrystalline quartz. These names are not systematically used. Instead, their use is often based upon the background of the person speaking, the geologic occurrence of the material, the properties of the material, and any historic use of the material.

Flint, Chert, and Jasper: Names for Microcrystalline Quartz - Geology

Archaeologists have found almost 200 examples of human vertebrae threaded onto reed posts in the Chincha Valley of Peru. The Chincha Valley had been home to the complex Chincha Kingdom from AD 1000-1400. They established an alliance with the Inca Empire and were eventually consolidated into it.

Archaeologists unearth human spines threaded onto reed posts ...

Archaeologists reveal life of small Roman town in Fleet Marston near Aylesbury, UK. Excavations are part of HS2's archaeology programme, where archaeologists uncovered a series of enclosures that contained evidence of domestic structures, as well as commercial and industrial activity.

Archaeologists reveal life in small Roman town - HeritageDaily ...

Archaeologists learned about their turquoise mining from tools found at ancient mining sites in San Bernardino County. [2] Native Americans also searched for tourmaline and used pieces of the colorful mineral as ornaments. [3] Native Americans were California's first miners, first jewelers and first gemologists.

California Gemstones: Tourmaline, Garnet, Turquoise and More - Geology

Geography and geology. Rona is an extension northward of the ridge of Raasay. Its geology is Lewisian gneiss and the glaciated landscape is underlain by some of the oldest rocks in western Europe.. Writing in the early 18th century, Martin Martin recorded that "this little isle is the most unequal rocky piece of ground to be seen anywhere: there is but very few acres fit for digging, the whole ...
