The M271 engine is modified with a 62mm pulley and tuned to ~200hp. The engine was running superfine until the middle of the summer where a vacuum leak appeared along with the known symptoms. It was the \$12 hose along with the PCV under the supercharger.

HELP: Bad adaptation values until engine restart along with bad idling ...

A turbocharger (abbreviated T or T/C), formally a turbosupercharger and colloquially known as turbo, is a turbine-driven, forced induction device that increases an internal combustion engine's power output by forcing extra compressed air into the combustion chamber. This improvement over a naturally aspirated engine's power output is because the compressor can force more air—and ...
