Norton's antivirus program isn't known for being the fastest antivirus software around; in fact, many users find that the software can slow down and bloat computers on which it is installed, whereas free alternatives are often faster. At the very least, if a machine is running slowly, it's worth checking if a scan is in progress.

A gear is a rotating circular machine part having cut teeth or, in the case of a cogwheel or gearwheel, inserted teeth (called cogs), which mesh with another (compatible) toothed part to transmit (convert) torque and speed. The basic principle behind the operation of gears is analogous to the basic principle of levers. A gear may also be known informally as a cog.
