For him reflective practice was to be enacted. It may be that his theory of reflective practice is far less 'critical' than it appears to be, 'since it is not directed to its own situated practice of doing theory' (Usher et. al. 19977: 147). However, it remains very suggestive - and for has some very real echoes in people's accounts ...

In probability theory and statistics, a copula is a multivariate cumulative distribution function for which the marginal probability distribution of each variable is uniform on the interval [0, 1]. Copulas are used to describe/model the dependence (inter-correlation) between random variables. Their name, introduced by applied mathematician Abe Sklar in 1959, comes from the Latin for "link" or ...

The above code doesn't contain the driver program. We will be covering the complete program in our next post on B-Tree Insertion. There are two conventions to define a B-Tree, one is to define by minimum degree (followed in Cormen book), second is define by order. We have followed the minimum degree convention and will be following same in coming posts on B-Tree.
