Sound Science is a monthly podcast about the science stories that affect our lives and have in some way influenced music. Hosted by Neuroscientist Dr. Yewande Pearse, Sound Science brings you stories from experts in the fields of music and STEM, that will make you hear science differently.

Sound Science

Sound - Sound - Impedance: One of the important physical characteristics relating to the propagation of sound is the acoustic impedance of the medium in which the sound wave travels. Acoustic impedance (Z) is given by the ratio of the wave's acoustic pressure (p) to its volume velocity (U): Like its analogue, electrical impedance (or electrical resistance), acoustic impedance is a measure of the ease with which a sound wave propagates through a particular medium.
